

2025-2026 School year so far

This school year is by far my favorite year to be in school. I made so many friends and good memories I will never forget. I joined soccer and it was the best decision I made being in this school. I was in a good position and we felt like family. I learned a lot from my team and my coach was amazing at helping me with the mistakes I made in the field and made me more confident. At the beginning of the year I wasn't doing well with my grades and would feel so drained to be at school. Now I don't feel as drained or tired and I have gotten better grades. I would say my favorite high school experience was joining soccer and creating many memories and friendships.
